

TRAINING PROGRAM

Training

ASCM - CTSC - Certified in Transformation for Supply Chain

Objectives

For the learner :

- > Acquire skills in systems thinking, digital fluency and analytical methods for all types of supply chains
- > Lead major transformation projects

For the Company :

- > Have transformational leaders with skills in systems thinking, digital fluency and analytical methods for all types of supply chains
- > Have leaders able to lead major transformation projects.

At the end of the training program, the learner will be able to:

- Identify risks and opportunities, and select the appropriate frameworks, models and approaches to effect transformation
- Apply systems thinking to develop, analyze and validate concept alternatives for transformation
- Manage skills, roles, responsibilities and infrastructure needed for successful supply chain transformation
- Identify tools and technologies to enable effective supply chain transformation
- Identify and implement strategies for reinforcing and replicating improvements

Public and Prerequisite

Supply chain professionals currently assisting, supporting, initiating or executing a supply chain transformation within their organization or would like to gain the necessary skills to participate in a transformation project.

Being ASCM CPIM or CSCP certified is recommended.

Possible next stages and opportunities

Transformation project managers
Supply Chain Management
Consultants

Access Deadline

Registration possible up to 4 weeks before the start date of the session.

Program

Module 1: Supply Chain Transformation Overview
Module 2: Preparing for Supply Chain Transformation
Module 3: Executing Supply Chain Transformation
Module 4: Review of Supply Chain Transformation

Duration, pedagogical sequencing and tools

Flipped classes: the theoretical material is provided in advance by the ASCM book and the learners send in their questions before the sessions.

The training sessions are built around practical applications that require the theoretical inputs to be worked on beforehand: case studies, questions/answers, professional illustrations, sub-group activities and brainstorming.

The numerous exchanges allow the participants to fully understand the supply chain concepts.

The trainer also accompanies the learner asynchronously by e-mail.

Results monitoring and assessing

The exam consists of 150 questions, and you have 3.5 hours to complete the exam.

It is administered via computer-based testing at Pearson VUE test centers worldwide and online through the OnVUE system.

Methods for evaluating training by learners

At the end of the training course, a questionnaire is given to assess:

- o the overall level of satisfaction
- o the achievement of the defined objectives
- o possible areas for improvement in terms of both content and form

An attendance sheet will also be signed at each half-day of training.
