

TRAINING PROGRAM

Training

ASCM certificate - Technology

Objectives

For the learner :

- > Understand how to implement the latest technologies in your supply chain organization to reduce costs, boost performance and achieve a more sustainable supply chain.

For the Company :

- > Have the skills of its teams recognised with an international certificate
- > Have staff with an internationally recognised level of supply chain technology expertise
- > Have leaders who can contribute to the company's transformation plans

At the end of the training program, the learner will be able to:

- Streamline and improve operational performance using key technologies
- Bolster reliability and advance processes by proposing new solutions
- Minimize security threats and effectively know the benefits and risks of various supply chain technologies

Public and Prerequisite

Supply Chain Transformation Project Manager.

A 1st experience or training (initial or professional) in Supply Chain, as well as basic knowledge in flow management are recommended.

Possible next stages and opportunities

Other ASCM certificates and ASCM CPIM certification

Access Deadline

Registration possible up to 3 weeks before the start date of the session.

Program

6 modules :
Blockchain
Advanced Analytics and Automation
Internet of things (IoT)
Cybersecurity
Demand Planning Technologies
Additive Manufacturing (3D Printing)

Duration, pedagogical sequencing and tools

The course lasts 10.5 hours, divided into 3 half-days of virtual classes. It is essential to set aside time for personal work (30 hours in total).

The training sessions are built around practical applications that require prior reading of the chapters on the ASCM platform: discussions on key points, questions/answers, exercises, case studies, professional illustrations, group work.

To support personal work, we provide:

- Access to the ASCM e-learning platform: online materials, videos, quizzes.
- Illustrations, questions, group works, etc.

Results monitoring and assessing

ASCM Technology Certificate exam : 78 questions, 2 hours, open-book exam.

Methods for evaluating training by learners

At the end of the training course, a training assessment questionnaire is handed out, aimed at evaluating :
the overall level of satisfaction
the achievement of the defined objectives
possible areas for improvement in terms of both content and form

An attendance sheet will also be signed for the training.
